It would be ideal to be able to notify all staff the night before snow or ice occurs so childcare plans could be made early, however, in many cases the frozen precipitation may not begin falling until after midnight. We use various information sites that predict and track weather events. Staff go out into several areas of the county to check road conditions when a snow/ice event occurs. We do our best to make a decision to close or delay by 5:30 a.m. There may be times when there is frozen precipitation in the western part of the county near Concord and no frozen precipitation on the eastern end near Pamplin. In those situations, we must close the entire school division as we must take into consideration all county roads on which our buses and students travel.

On days that we have advertised a two hour delay and the road conditions do not improve significantly before buses must leave for their route, we may have to move from a two hour delay to a closed status. We will put out all notifications as soon as possible when this situation occurs.

Should frozen precipitation begin to fall once school has begun, we will close schools as quickly as possible if that precipitation and freezing temperatures are scheduled to continue.

The safety of our staff is very important to us.
